The WAVE modular garden furniture collection by GARDEN RABBIT combines functionality, comfort, and aesthetics, offering flexibility and customization for outdoor spaces. Inspired by natural shapes, the furniture is lightweight, comfortable, and adaptable to users' changing needs.

WAVE's innovation lies in its simplicity—it's made from two components: CPU foam and fabric. CPU Foam (Closed-Cell Polyurethane Foam) is durable, moisture-resistant, and dries three times faster than conventional foams, protecting against mold and odors. It is certified OEKO-TEX® STANDARD 100, ensuring safety for people and the environment.

The Special Fabric from FibreGuard Outdoor® is stain-resistant, durable, UV-resistant, and easy to clean. It maintains color and durability while combating mold, bacteria, and odors. It also holds OEKO-TEX® certification, making it safe for outdoor use.

The Form Flexibility of the furniture allows it to be compressed for transport, reducing costs and its carbon footprint. Once unpacked, the foam quickly regains its shape. Adjustable plastic legs ensure stability, easy movement, and better ventilation.

Complet Furniture is a Polish brand producing upholstered furniture...

"Tradition you can feel in every detail."

Complet Furniture is more than just a furniture company. It is the story of the Chmielewski family, who have been translating passion and craftsmanship into every element of their furniture since 1989. Led by father Zbigniew and son Robert, our company embodies the fusion of tradition and modernity, where each piece of furniture is not only functional but also has a soul.

We are proud that our upholstered furniture, symbolizing quality and durability, represents Polish design in global markets. Welcome to a world where craftsmanship meets innovation, creating products that tell stories.
